

# May we share in many Simcha Streams together!

Simchastream – Powered by Midabrim Communications

072-246-2070

Simcha Stream enables your family and friends to be part of your event even if they can't physically be there. Using the latest technology and equipment, Simcha Stream broadcasts your event live on the internet in Full HD quality via a secure website using bonding technology over multiple internet connections. This allows your loved ones to watch your event from their home, office, or anywhere with internet access. Our team of network engineers and professional videographers capture the event and enable those watching to feel as if they are right there beside you. Our staff escorts you through the entire process and provides all the technology and services necessary to broadcast your event as well as recording the event for those who were unable to watch it live.

The process is as easy as 1-2-3:

- 1** – After reserving the wedding date with Simchastream, you will receive an internet link in order to send out to your family and friends.
- 2** – When your guests click on the link using a Computer or Tablet they will be forwarded to the site where your wedding will be broadcasted.
- 3** – Drink a L'Chaim to the bride and groom.

In case of any technical difficulties the viewer can call or chat with our network center.

What makes us the primary choice both by private and public customers is the quality of our service and our wide variety of options which can keep a low budget event even for personal usage. Our broadcasts can be done from low-res HD (480p) up to 1080p FULL HD (high res) while keeping the prices down in order not to go over a budget.

We will work with you in order to fulfill your needs with keeping the costs on the lowest possibility without effecting the quality.

#### **FAQ:**

**Q: What differentiates Simchastream from the other companies?**

**A: Simchastream is a sub-company of Midabrim Communications a company providing many communication services such as cellphone rental's, voice over ip telephone lines, and internet connections. Being a sub company lets Simchastream use all of its infrastructure including all the major providers in Israel, the infrastructure is the main key to providing a quality broadcast. As midabrim requires for all its services we are obligated to provide the best customer service for the clients we send to each event a videographer, an on-site technician plus a technician in the monitor center who provides technical support for the viewers and monitor for any issues. We have been put to the test many times at events where there is no**

reception and we were the only company who was able to successfully broadcast from that location. We work closely with many of the leading event planners in Israel who have recommended us for the service and quality that we give their clients. The best recommendation that we have are the amount of clients that use our service. You can view our youtube channel to see most of our broadcasts.
