

# May we share in many Simcha Streams together!

Simchastream – Powered by Midabrim Communications

072-246-2070

Simcha Stream enables your family and friends to be part of your event even if they can't physically be there. Using the latest technology and equipment, Simcha Stream broadcasts your event live on the internet in Full HD quality via a secure website using bonding technology over multiple internet connections. This allows your loved ones to watch your event from their home, office, or anywhere with internet access. Our team of network engineers and professional videographers capture the event and enable those watching to feel as if they are right there beside you. Our staff escorts you through the entire process and provides all the technology and services necessary to broadcast your event as well as recording the event for those who were unable to watch it live.

The process is as easy as 1-2-3:

- 1** – After reserving the wedding date with Simchastream, you will receive an internet link in order to send out to your family and friends.
- 2** – When your guests click on the link using a Computer or Tablet they will be forwarded to the site where your wedding will be broadcasted.
- 3** – Drink a L'Chaim to the bride and groom.

In case of any technical difficulties the viewer can call or chat with our network center.

As part of simchastream's advancements in order to bring the wedding to your family abroad, we have created a solution in which we can bring your family abroad to the wedding. Having 2 way video allows your family to be seen at the wedding hall itself in order to have direct conversations with your family.

What makes us the primary choice both by private and public customers is the quality of our service and our wide variety of options which can keep a low budget event even for personal usage. Our broadcasts can be done from low-res HD (480p) up to 1080p FULL HD (high res) while keeping the prices down in order not to go over a budget.

We will work with you in order to fulfill your needs with keeping the costs on the lowest possibility without effecting the quality.

Price	1800	2500	3200
Additional Hour			550

Since broadcasting is all about internet network's all our packages include:

- Professional Videographer using the newest and most advanced Full-HD Camera
- On site Network Engineer – As internet networks can be very unstable we have an onsite Network engineer to overcome any obstacle or any network related issue to ensure a steady broadcast at the highest bitrate.
- Network Operating Center / Technical support for your viewers – In case your viewer is having a problem we have support reps at our network center who are also monitoring the broadcast.

These 3 staff members are essential for every broadcast, from the smallest event to the biggest event.

**Payment:**

25% upon reservation of a specific date the rest shall be paid on the day of the event  
 Payment can be made by check, Cash, or Credit Card (Charged by 1uniphone in Michigan).

**If travel necessitates overnight travel, lodging must be provided**

**Prices are not including 17% VAT which are added to all charges unless payment is by a US citizen.**

**FAQ:**

**Q: What is the difference between the first and second package?**

**A: The first package is in lower video quality in order to broadcast in high video quality and to reach FULLHD we need to utilize more than 4 networks as in Israel the providers don't allow such a high amount of bandwidth on one single network. So although you can provide 480p HD quality using one network we recommend using the second package this way we can broadcast in higher quality. In addition when using 5 networks we can rely on multiple networks and we are not limited to a single network, if for any reason some networks are not working (such as low reception, congestion, or even maintenance on the network) the broadcast uses other networks without any video loss.**

**Q: Why do the full hd packages cost more then the regular packages?**

**A: In order to broadcast in high quality the amount of bandwidth needed is over 4mbits in Israel a single network can provide up to 1.5 mbits. Therefore we need to use multiple networks to provide high quality video, the more networks used the more expensive the broadcast gets. If any provider gives a lower price for HD that should be a red flag as many networks should be used otherwise this will cause major issues.**

**Q: What differentiates Simchastream from the other companies?**

**A: Simchastream is a sub-company of Midabrim Communications a company providing many communication services such as cellphone rental's, voice over ip telephone lines, and internet connections. Being a sub company lets Simchastream use all of its infrastructure including all the major providers in Israel, the infrastructure is the main key to providing a quality broadcast. As midabrim requires for all its services we are obligated to provide the best customer service for the clients we send to each event a videographer, an on-site technician plus a technician in the monitor center who provides technical support for the viewers and monitor for any issues. We have been put to the test many times at events where there is no reception and we were the only company who was able to successfully broadcast from that location. We work closely with many of the leading event planners in Israel who have**

recommended us for the service and quality that we give their clients. The best recommendation that we have are the amount of clients that use our service. You can view our youtube channel to see most of our broadcasts.

**Q: What is Redundancy?**

**A: Redundancy is a networking term in which a device recognizes that a connection it is trying to use is not working properly and will hop to another connection in order not to lose the information that it is trying to transfer. This provides 100% guarantee that information transferred does not get lost.**

## Testimonials:

Hello Yehuda and Efrayim,

I just wanted to thank you for a superb job webstreaming my daughter's wedding. It brought such nachas to my mother in the States who was able to send the link to all of her friends and have them watch it live from the comfort of their own living rooms. Then, they called her to discuss, and she felt almost as good as if she had been their herself...if not better because she didn't have to suffer the displacement and jetlag. Not only was the quality of your broadcast excellent, but your service oriented attitude – and real wish to please – made it such a pleasure to have you at the simcha. Instead of feeling an adversarial attitude that you were a vendor I had to "deal with" to be sure I got I paid for, I felt that you were a caring friend who was interested in doing the best job possible...and then some. You stayed around to film the couples entrance and initial dance with the parents. I was so surprised when my mother told me that, as I hadn't even realized! And that was after I paid you!

Please feel free to use me as a reference for anyone!

Thanks for everything, and may we continue to share simachos, Yonina Shineweather
